

Because keeping you safe is our top priority... Please take a moment to read through the following care and use instructions for your new gloves.

Made of ultra high molecular weight polyethylene, glass fibre and spandex.

Machine wash with mild detergent at max 104°F (40°C). Hang to drip dry.

The gloves are designed to offer extra protection against cut related accidents.

If repeatedly cut with a sharp blade the gloves might unravel.

The gloves will not make you invincible. They do have their limits and work best when used with caution. Be as careful when using them as you would be without them.

Do not use the gloves when operating power tools!

By using sharp objects solely for testing you risk making the gloves unusable.

Remember to download your free ebook and feel free to contact us.
